## B. Postgraduate Diploma Programs

#### Course Objectives

Postgraduate diploma courses are intended for candidates who already have basic training at either degree or diploma level. They7 aim to give the candidates a sound scientific foundation and practical skills in the particular discipline, so as to develop competent personnel who can practice independently.

#### Course Structure

The courses consist of theoretical modules, clinical modules and case studies, where applicable. University examinations will be taken at the end of the year of study.

**Postgraduate Diploma in Control – Management of STI. Course shall be taught by distance learning.**
